3D logo in orange and blue

Four three-dimensional versions of the Velmach V mark. Each page shows the full logo and the mark from four angles, so the depth of the model is visible. The matching .glb 3D files are in the same delivery folder.

VELMACH

AEROSPACE F.Z.C

MODEL 1 OF 4

Orbit Monogram

The current V and A ligature rebuilt in depth: a blue V and a sky-blue A share one stroke. An orange flight path circles both and ends in an aircraft. It stays closest to the logo used today, so the change to orange and blue reads as an update, not a rebrand.

VELMACH

AEROSPACE F.Z.C

MODEL 2 OF 4

Hangar Badge

A deep-navy hexagon with the V cut through it and an orange V set into the cut, like a stamped part tag. The flat outline stays clear down to 16 px, so it suits icons and small marks.

VELMACH

AEROSPACE F.Z.C

MODEL 3 OF 4

Mach Globe

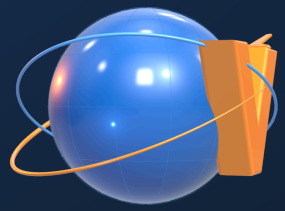

A blue globe with latitude and longitude lines, two flight orbits and an orange V on the front. It shows global parts supply out of the UAE. It needs room to read well, so use it large.

VELMACH

AEROSPACE F.Z.C

MODEL 4 OF 4

Velocity Chevron

The V split into a blue arm and a longer orange arm that climbs like a take-off line, with three speed bars behind it. It is the most modern of the four and the easiest to animate.
